

# NTI-32

## EPOXY CURING CONNECTOR OVEN

- **Excellent thermal stability**  
Accurate control of the temperature (+/- 3°C) provides consistent and repeatable performance. Large area thermal block helps to provide stability in curing all types of epoxies.

- **Thermocouple based P.I.D. Temperature Controller**  
provides accurate stable performance over a wide range of temperatures.

- **Built in cable holder**  
makes cable management easy for the user.

### Specifications

- Number of Ports: 32
- Temperature Stability: +/- 2°C
- Temperature Range: Ambient - 200°C (Ambient - 392°F)
- Accuracy: +/- 3°C
- Power: 120VAC, 5 Amp
- Time to 100°C = 17 Min. ( from ambient )

### Size

- Width: 15"
- Height: 13" w/ Cable holder
- Depth: 10"
- Weight: 19 lbs.
